Continuation Sheet (PTOL-303)

Continuation of 2. NOTE: The election reguirement of July 26, 2001 has not been withdrawn and still stands. The requirement stated that claims 22-24 are directed to specific species while claims 1-20 and 25-27 are generic. In response to applicant's election, the traversal was found persuasive only insofar as claims 22-24 were concerned.

Applicant contends that the present invention relates to a solid film adapted to adhere and dossolve in the mouth. None of the claims state that the claimed film is adapted to adhere and dissolve in the mouth. Ozaki et al state that pullulan has film-forming ability and can be used with pharmaceuticals (column 1, lines 19-25). Eichman discloses the pharmaceutical encompassed by the instant claims. A person having ordinary skill in the art at the time the instant invention was made would have been motivated to use pullulan for its film-forming ability with any pharmaceutical including those disclosed by Eichman.

The term "solid" (claims 1-22 and 25-34) and the terminology "pharmaceutically active agent is present at a ratio to said taste masking agent of 1:3 to 3:1) (claim 1) is not disclosed or suggested by the specification as originally filed. Note that page 17 of the specification provides support for "the pharmaceutically active agent adsorbate to oion exchange resin adsorbent in the adsorption complex is about 1:3 to about 3:1" i.e. taste masking agent is not the same as ion exchange resin.

The newly presented claims 33-34 would require further search and consideration.
